Campus Manager & Ambassador - Frosh Fest 2025

Aug 2025 – Apr 2026

University of Waterloo

Waterloo, ON

- Selected to lead student engagement and campus outreach initiatives for Frosh Fest 2025
- Promote events through social media campaigns, residence outreach, and student networking efforts
- Support branding and communication strategies for large-scale campus events

Research Co-op Student

Feb 2024 – Jun 2024

SARIT @ York University - Lassonde School of Engineering

Toronto, ON

- Assisted in testing and troubleshooting 5+ vehicle systems and related code implementations
- Created technical reports and documentation to track project functionality and progress
- Developed hands-on technical experience with electronics, soldering, wiring, and cable management

Summer Experience Pilot Program

Jul 2024 – Aug 2024

SARIT @ York University

Toronto, ON

- Participated in a competitive engineering and technology pilot program focused on electronics and Python programming
- Collaborated with team members to improve vehicle system functionality through technical problem-solving
- Completed hands-on engineering and programming activities in a university lab environment

PROJECTS

ClawCourt (Agent 58) | Next.js, TypeScript, GOAT Network, AI Systems

May 2026

- Collaborated on an autonomous escrow and AI referee platform built during OpenClaw Toronto using GOAT Network infrastructure
- Designed and developed the live ledger dashboard and real-time visualization layer for transaction monitoring and settlement tracking
- Visualized the complete escrow lifecycle including lock, inspection, release, and refund states across the agent workflow
- Worked alongside teammates integrating blockchain settlement logic, AI referee verification flow, and transaction event monitoring
- Contributed to a project recognized with the **UX Master Award** and **x402 Master Award**

EcoOffset Chrome Extension | React, JavaScript, Chrome APIs

Mar 2026

- Built a Chrome extension focused on sustainability-aware online shopping experiences during the GenAI Genesis hackathon
- Developed browser-based frontend functionality and interactive user interfaces using React and JavaScript
- Collaborated in a fast-paced hackathon environment to rapidly prototype, iterate, and present the final product

Memory Match Mania | JavaScript

Jun 2024

- Developed an interactive memory matching game with dynamic gameplay mechanics and visual feedback systems
- Implemented adaptable difficulty settings, animations, and user interaction features
